# Finding Mode

The mode of a data set describes the data that occurs most often. It can be found by counting how many times something happened, and seeing which one happened the most. Sally took a survey of people's favorite desserts. Help her find the mode.

Name	Type of Desserts (can be more than one)
Mick	Donut, Chocolate, Cupcake
Ronny	Apple Pie, Cheesecake, Donut
Betty	Cheesecake, Donut, Pecan Pie
Zoey	Pumpkin Pie, Chocolate, Donut, Cookie

Count how many of each type of desserts appear.

Apple Pie = _____ **Pumpkin Pie** = _____

Pecan Pie = _____ **Donut** = _____

Cookie = _____ **Cupcake** = _____

Chocolate = _____ **Cheesecake** = _____

The dessert that appears the most is _____

The mode is _____
